**We all live in the Milky Way
The Milky Way's our galaxy
We all live in the Milky Way
It's home to you and me**

And in that galaxy, there's a star
A star in the middle of a galaxy
That's home to you and me

We all live...

Around that star, a planet spins
A fine planet, called the earth
Planet 'round the star,
Star in the middle of a galaxy

We all live...

On that planet, there's a sea
A fine sea, a shining sea
Sea on the planet, planet 'round the star..

We all live...

By that sea, there's a land
A fine land, a very fine land
Land by the sea...

We all live...

In that land, there's a town
A Fine town, a very fine town
Town in the land, land by the sea...

We all live...

In that town, there's a street
A fine street, a very fine street
Street in the town, town in the land..

We all live....

In that town, there's a street
A fine street, a very fine street
Street in the town, town in the land...

We all live...

On that street, there's a house
A fine house, that's your house!
House on the street, street in the town

In that house, there's a person
A fine person, **that's you!**
Person in the house, house on the street.

We all live.....
